

# AP Calculus BC Summer Assignment

Welcome to AP Calculus BC! This cover page will provide you with all necessary information you will need to complete your summer assignment in this course.

**Please read ALL of the information that follows, as it is extremely important.**

## **Materials:**

You will need the following materials to complete the summer assignment and be prepared for the first day of class:

- Internet access
- [TI-84 Graphing Calculator](#) (you do not need to get the color edition)
- Pencils, loose-leaf paper, and a binder

\*\*There is no textbook needed for this course.

## **Directions for Completing the Summer Assignment:**

Please complete the following before the first day of class:

- Go to [www.khanacademy.org/join](http://www.khanacademy.org/join) and enter the class code: GRUSES1W. You will need to create an account in order to access the videos and questions.
- Complete all assigned videos, exercises, quizzes, and tests on Units 1 and 2 (you can skip videos if the videos explain content that is repetitive for you). You must achieve 90% mastery of the assigned topics. You can retake any of the assessments until you have achieved that mastery.

## **Additional Information:**

- \*\*If you are coming from Precalculus, you may have additional summer work assigned through Khan Academy. Please complete that as well.
- We will have an assessment on Unit 1 (Limits and Continuity) on the second or third day of class (date of test to be announced in class).

If you have any questions, please email Michelle Gavin ([mgavin@solebury.org](mailto:mgavin@solebury.org)). I look forward to this year in AP Calculus BC!
